Displays - Leatherette

Changing the way you display...

Ice Grip Displays

The technology utilised by Ice Grip was developed in 2003 and provides a revolutionary way to display your jewellery.

Our traditional and contemporary style jewellery displays are covered in a patented, slip free material.

This material “grips” the jewellery, holding it in place without hooks, clips, Velcro or elastics.

Ice Grip displays reduce set up and pack up times and end the frustration of bracelets and necklaces falling at the slightest touch.

Finally.... jewellery displays created by jewellers who use them!

Ice Grip's slip free material hold jewellery in place without hooks, clips, Velcro or elastics.

Traditional displays can't stand up to Ice Grip.

Ice Grip FAQ's

Q. How long will the gripping effect of Ice Grip material last?

A. The gripping effect is not simply a topical application it is an integral part of the material and will not wear off.

Q. Will Ice Grip material harm pearls, gems or precious metals?

A. No, Ice Grip material has been tested for reaction with all precious metals, pearls and gemstones with no ill effects.
However, it should not be used to display leather!

Q. How do I clean Ice Grip displays?

A. To remove dust or to renew the grip, simply wipe with a damp cloth. Heavily soiled displays can be wiped clean with most household cleaners, including glass cleaner.
However, do not immerse in liquid!

Q. How can Ice Grip displays save and make me money?

A. Using Ice Grip displays, reduce set up and pack up time, and maximise sales opportunities by minimising repositioning time during and between sales.

Q. Will I need to replace all of my displays or will Ice Grip match my existing displays?

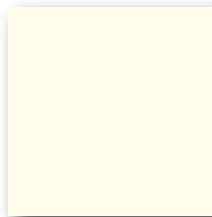

A. Ice Grip displays are designed to match regular leatherette displays, so you can replace as many items as you wish, at any time.

Q. What colours are available?

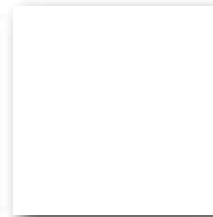

A. Our standard colours are black, cream or white.

Black

Cream

White

Q. Can I have my own designs or colour?

A. Yes, just provide us with your sketch and we will quote your custom designs.

The Breakaway Tray

The Problem

The traditional ring tray

Jewellery display frustration doesn't end with necklaces and bracelets. Finding a ring or earring tray with the correct number of slots is often a challenge.

With traditional ring displays, when a ring is sold you must fill the space with a sold tab, or it remains empty until your display is restocked.

The Solution

With The Breakaway Tray you remove the empty cube. The remaining cubes are then realigned and your display always look full.

Ice Grip's The Breakaway Tray is a fully adjustable system, allowing individual cubes to be added or taken away as needed. The cubes magnetically adhere to the base so the tray operates as one unit.

Ice Grip jewellery displays and The Breakaway Tray are registered trademarks and US and PCT patent pending.
